Abstract:

PURPOSE: To attain the effective monitoring tasks at a remote monitor center by referring to the images obtained before a sensor detects an abnormal state as well as the images obtained after

detection of the abnormal state.

CONSTITUTION: An image memory 5 repetitively stores the image data photographed by a video camera 2 successively at and after the head address through the final address. When a sensor 3 detects an abnormal state of the robbery or a fire and outputs a detection signal, a control part 9 controls an address monitoring part 6, an image memory 5, and an image transmission pert 7 respectively. Then the part 9 automatically transmits the image data to a monitoring center 10 from the memory 5 in the order of older
